

Arpitha HM

Computer Science and Data Science Graduate

✉ arpithahm2005@gmail.com ☎ 9964080294 📍 Mandya, Karnataka  LinkedIn  GitHub

Professional Summary

Recent B.E. graduate in Computer Science and Data Science with hands-on experience in Python, backend development, web application development, and software engineering through internships and academic projects. Strong foundation in Object-Oriented Programming (OOP), SQL, React.js, software testing, debugging, and Software Development Life Cycle (SDLC). Passionate about developing reliable, scalable software solutions and automation tools while continuously learning modern technologies in Agile environments.

Internship

Python Full Stack Development Intern, Pentagon Space	01/2026 – Present Bengaluru
• Developed Python backend applications using Django and REST APIs. • Worked with MySQL databases, API integration, testing, and debugging. • Assisted in building scalable web applications following SDLC practices. • Collaborated with team members using Git and Agile development practices. • Participated in code reviews, documentation, and application deployment activities.	
Software Development Intern, Getskilled (A unit of Gyaan Kool Research labs)	04/2025 – 08/2025 Bengaluru
• Developed Python-based applications and automated workflows. • Processed and analyzed data to improve application performance. • Performed testing and debugging to ensure software quality. • Collaborated with team members to enhance application functionality.	

Education

B. E. in Computer Science and Data Science, <i>Maharaja Institute of Technology, Mysore</i> 8.5 CGPA	2026 Mysore
Class 12th, Mandavya Excellence Pre university college, Mandya 84%	2022 Mandya

Skills

Technical Skills

Programming Languages: Python, SQL, JavaScript
Web Technologies: HTML5, CSS3, React.js, REST APIs, Django, Flask
Database Management: MySQL, MongoDB
Software Development: Object-Oriented Programming (OOP), SDLC, Testing, Debugging, Software Design
Version Control & Tools: Git, GitHub, Visual Studio Code
Cloud & Development: AWS (Basics), DevOps Concepts (Basic)

Soft Skills

Analytical Thinking, Time Management, Team Collaboration, Problem Solving, Effective Communication, Attention to Detail.

Projects

AI-Powered Virtual Tutor with Generative AI, Python, OpenAI API, NLP

- Developed an AI-powered tutoring assistant using Large Language Models (LLMs).
- Implemented prompt engineering and NLP techniques for intelligent question answering.
- Built personalized quiz generation and content summarization features.
- Integrated OpenAI APIs for conversational AI.
- Improved adaptive learning through context-aware responses.

AI-Based Acne Detection & Severity Classification System,

Python, PyTorch, Machine Learning, Computer Vision

- Developed a machine learning-based web application to classify acne severity using EfficientNetV2.
- Performed image preprocessing, feature extraction, and model optimization for accurate predictions.
- Designed an automated prediction pipeline for real-time image analysis.
- Built a user-friendly interface for image upload and result visualization.

Hostel Management System, Python, MySQL, HTML, CSS, JavaScript

- Developed a hostel management application for student registration and room allocation.
- Designed and maintained relational databases using MySQL.
- Performed functional testing and debugging to validate system behavior.
- Executed test scenarios to verify data accuracy and application functionality.
- Improved reliability through defect identification and resolution.
- Maintained records and validated data accuracy using MySQL databases.

Certifications
